REP REVE
RECYCLED FIBER BY UNIFI

GIVING FABRICS A SECOND CHANCE

LET'S CUT OUT MILLIONS OF POUNDS OF WASTE TOGETHER.

Now, it's possible to reclaim fabrics from Repreve customers and recycle them back into the authentic recycled fiber of choice—Repreve. Give your fabrics a second chance through the Repreve Textile Takeback program.

A NEW WAY TO CUT OUT WASTE

ONCE AGAIN, REPREEVE IS LEADING THE WAY. CREATING ANOTHER REPRIEVE FOR THE PLANET.

At our state-of-the-art Repreve Recycling Center, we've expanded the process for making Repreve. We're now recycling a variety of materials from different waste streams, to create a new Repreve Takeback fiber that includes recycled fabric content. Like all Repreve fibers, it's traceable, transparent, and certifiably sustainable.

TEXTILE TAKEBACK PROGRAM

HOW TO GIVE FABRICS A SECOND CHANCE.

Until now, textile waste has typically been down-cycled or put into the landfill. The Textile Takeback program gives fabrics a second chance by recycling them back into a new Repreve product: Repreve Takeback fiber.

We're looking for qualified Repreve customers to join our sustainable journey by participating in the Repreve Textile Takeback Program. You'll be asked to undergo an initial approval process to become further qualified as a participant in the program. This will help develop a process that fits everybody's needs—ensuring that the resulting fiber is made with the same quality and integrity you've come to expect from Repreve.

INTERESTED IN BEING A CERTIFIED PARTICIPANT?

- ☞ Participant eligibility starts with being a Repreve customer.
- ☞ We employ mechanical recycling, so right now our focus is on recycling supply chain fabric waste made from polyester, and post-consumer polyester fabrics at the end of their life.
- ☞ If you meet the above criteria, we invite you to enter our Repreve Textile Takeback approval process to check participant feasibility.
- ☞ From the fabric waste you provide, we make Repreve Takeback fiber — offering you a new option in eco-friendly recycled fibers.

For more information, please contact your Unifi account manager or email us at reprevemarketing@unifi.com.

PLEASE NOTE:

* The Textile Takeback program is currently available in the Americas due to the proximity of the Repreve Recycling Center. As we continue to expand the Repreve brand, Unifi will strive to offer this program in other areas.

** Repreve Takeback fiber, made from a post-consumer blend and reclaimed fabrics, contains a minimum of 5% fabric waste.
